## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a device for inserting sheets into an envelope.

Group II, claim(s) 14&15, drawn to a device for opening an envelope.

Group III, claim(s) 16-18, drawn to a device for continuously feeding of stacks of envelopes.

Group IV, claim(s) 19-21, drawn to a method for inserting sheets into an envelope.

Group IIV, claim(s) 22, drawn to a method for opening an envelope.

Group VI, claim(s) 23, drawn to a method for continuously feeding of stacks of envelope.

The inventions listed as Groups I-IV and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-IV lack the technical feature of lifting a first stack of envelopes by a first lift, taking over the first stack of envelope by a second lift in a transfer position, moving the first lift, and receiving a second stack of envelopes, as been disclosed in Group VI.

Groups I-IV and IIV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-IV lack the technical feature of opening an envelope flap with a focused volumetric flow of air being blown under the envelope flap, as been disclosed in Group IIV

Groups I-III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical

features for the following reasons: Groups I-III lack the technical feature of bending a front part of the envelope, pulling the envelope onto the holding device, as suggested in Group IV.

Groups I&II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I&II lack the technical feature of feeding of stacks of envelopes with lifting the stacks of envelopes in a stacking region along a straight path, as suggested in Group III.

Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I lack the technical feature of a blowing unit with a nozzle duct, as suggested in Group II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
